

A technical drawing of a roundabout (Rundplatz) from a top-down perspective. The central area is a solid green circle, surrounded by a grey-paved circular zone. Four road approaches enter the roundabout from the top, bottom, left, and right. Each approach has a yellow dashed line for the edge and a solid yellow line for the lane. Traffic flow is indicated by arrows: clockwise for the roundabout and straight ahead for the approaches. The drawing includes details like kerbs, drainage lines, and surrounding road infrastructure.
